authentik

To install authentik follow this documentation

https://docs.goauthentik.io/install-config/install/docker-compose/

Follow the video

- I think we got an issue with theauthentic and resolved . the issue happens while in the login console like that .

Issue: -
- I entered user and pass. my own user and pass (default user and pass didn't tried), error happen. Then i tried like injucted the user and the pass through the command like and tried different browser and log on that one.
